

Safe Drinking Water

When water is unsafe and sanitation non-existent, water can kill. Globally, waterborne illnesses are a leading cause of death for children under five, killing 1,000 children every day. - UNICEF

CHW Training
4 DSHS Certified CEUs

Course Objectives:

Preparing CHWs/*Promotores* with resources on safe drinking water and how to share this information with their communities.

Students will learn how to:

- ✚ Define safe drinking water, list water contaminants, how water affects health, and ways to conserve water.
- ✚ Develop focus group questions on health concerns and develop interventions based on information gathered
- ✚ Demonstrate the ability to share information on safe drinking water with residents in their communities
